

FEPROMIX

A Final Blend for Healthy Gut Flora

Composition

Some strains of probiotics also have the ability to suppress the growth of molds/fungus besides degrading the waste organic matter & sediments in the pond which enables to keep the water clean and hygienic.

Description

The probiotics in **FEPROMIX** produce many enzymes and forms a symbiotic relationship with the hosts in the slime layers of fish/prawns. These also help in the decomposition of excess & waste organic matter and suppress the growth of undesirable microbes in the pond and on the host besides having an activity inside the gut. These also decompose the waste & excess organic matter in the pond there by helps to keep the water clean. These are also known to produce substances inhibiting the growth of undesirable bacteria, especially *Vibrio* spp., & for their ability to solubilize phosphates. Antibiotic like Bacitracin are produced by some strains of probiotics, which suppress the growth h of undesirable microbes & is very useful in degrading excess organic matter in the pond & also waste materials like sediments& chitinous exoskeletons of the shrimps, because of their ability to produce the enzyme Keratinise.

Indications

- Reducing harmful pathogen load in the gut by competitive exclusion process.
- Proper feed utilization & Improving gut flora
- Improving digestive process
- Improving the feed absorption
- Enhancing immunity and to prevent stress
- Controlling mortality & to improve survivability
- Maintains a healthy, balanced gut micro flora
- Reduces digestive upsets
- Improves FCR (feed conversion ratio)

Doses and Administration

Shrimp : 5 – 10 grams per Kg of feed
Fish : 5 – 10 grams per Kg of feed

Or as recommended by an Aquaculture consultant

Storage

Store in original closed container only & in a dry location away from heat and out of direct sunlight

Warnings & precautions

Aqua/animal feed supplement keep out of reach of children. Do not return unused products to container
For aquaculture use only

Side effects

None

Withdrawal periods

Nil

Packing

200 gm & 500 gm HDPE Jar
