

POLYMIX RUMENCURE

Composition:

Each gram contains:

Calcium Propionate	500 mg
Silicium Oxide	12.5 mg
D.L Methionine	40 mg
Cobalt Carbonate	0.1 mg
Pyridoxine Hydrochloride	0.38 mg
Glucose up to	1 gm

Role of Ingredients:

Calcium Propionate

Calcium propionate plays an important role in fat metabolism & reduces ketosis in lactating cow.

Silicium Oxide

Silicium oxide decreases the surface tension of gas bubbles in the rumen.

D.L Methionine

Methionine is an essential amino acid. Methionine functions as a precursor for protein synthesis.

Cobalt Carbonate

Cobalt carbonate is an essential trace element in ruminant nutrition and participate in synthesis of vitamin B₁₂ (cyanocobalamin) which is important in ruminants.

Pyridoxine Hydrochloride

Pyridoxine hydrochloride plays a critical role in hormonal balance and fertility as well as having key functions in the immune system that protects the animal from infection.

Benefits:

- Prevents relevant nutritional deficiency
- Improves ruminal health & digestion
- Supports ruminal microbial activity
- Maintains optimum rumen pH
- Prevents bloat/tympany

Inclusion rate:

Cattle	: 125-250 g per animal per day through feed/water.
Calf	: 62.5 g per animal per day through feed/water
Sheep and goat	: 31.25 g per animal per day through feed/water

Withdrawal Period: Meat & Milk- Nill

Storage: Store in a dark, cool & dry place. Keep out of reach of children

Shelf life: 2 years

Packing: 25 kg bag.

Only for use in animal feed

Marketed by:
Navana Pharmaceuticals Ltd.
Rupshi, Rupganj, Narayanganj, Bangladesh.

Exporter Name & Details Address:
CACHAREL PTE LTD.
56 KALLANG PUDDING ROAD, #07-03.
SINGAPORE 349328

Manufactured by:
Agro Nutrition (Pvt) Limited
Office: # 57, St. Rita's Road, Mt. Lavinia, Sri Lanka.
Factory: # 59, Moronthuduwa Road, Melagama, Wadduwa.
