

**WSP**  
**D-vet**  
**(Doxycycline Hydrochloride BP)**

**Only for the use of animals**

D-vet is a light yellow, free flowing water soluble powder. It is a broadspectrum antibiotic synthetically derived from oxytetracycline that offers primarily bacteriostatic effect. D-vet exerts its antibacterial activity through inhibition of bacterial protein synthesis.

**Composition**

Each gram powder contains Doxycycline Hydrochloride BP equivalent to Doxycycline 100 mg.

**Indications**

D-vet powder is active against a wide range of Gram positive and Gram negative bacteria including Mycoplasma species, D-vet powder is indicated for the control and treatment of infections caused by *Escherichia coli*, *Mycoplasma gallisepticum*, *Mycoplasma synoviae* and Complicated Chronic Respiratory Disease (CCRD) in growing chicken, resulting in maintenance of weight gain and in reduction of mortality and lesions.

**Dosage and Administration**

D-vet water-soluble powder is advisable to apply with drinking water as per following dosage schedule:  
Add 1g D-vet powder in 2 liter of drinking water.

- 1st application : Use for the first 3 days of life.
- 2nd application : Repeat for 3-5 days at 4-5 weeks of age.
- During stress of at the onset of respiratory disease symptoms : use for 3-5 days.

The duration of this application depends upon the severity of risk.

Required amount of D-vet powder to treat a flock can be determined by the amount of water consumption per day by the same flock.

**Contraindication**

D-Vet is contraindicated in animal with known hypersensitivity to doxycycline.

**Side effects**

Allergic and photosensitivity reactions can occur. Intestinal flora may be affected if treatment is very prolonged, and this may result in digestive disturbance.

**Withdrawal Period**

Meat- 5 days. Egg- 4 days

**Storage**

Store at a temperature below 30°C protected from light & keep in cool and dry place. Keep all medicines out of reach of children

**Packing**

10X100 g sachet
