Description

Supplementation of good nutrition can ensure the body weight gain in poultry/livestock. If their needs are not met, the animals won't properly grow, reproduce, produce egg, meat & milk. As most feed stuffs are low in vitamins, minerals & amino acids, their supplements are necessary. Supplementation of Chick Vit MA (balanced combination of essential vitamins, minerals & amino acids) ensures good nutrition.

Indication

- ❖ Improves body weight gain & production (egg, meat &/ milk)
- ❖ Improves FCR
- ❖ Improves immunity
- ❖ Prevents vitamins, minerals & amino acids deficiency related diseases
- ❖ Minimizes stresses (vaccination, diseases, medication, transport, extreme hot/cold weather, weather changes & molting period)

Dosage & Administration

Poultry: 1-2 ml per liter of drinking water for 5-7 days.

Or as directed by the registered Veterinarian.
