

Water Soluble Powder
VETAPAR
(Piperazine Citrate)
Only for the use in animals

Composition

Each 100g contains Piperazine Citrate USP 100 g.

Indication

Vetapar is used against Ascaris, Oesophagostomum, Oxyuris, Trichuris and some Strongyloides. It is effective against all adult forms as well as against some evolutive stages of worms where it is found to be a drug of first choice.

Mode of Action

Vetapar acts to block the neuromuscular transmission in the parasites by hyperpolarizing the nerve membrane, which leads to flaccid paralysis. It also blocks succinate production by the worms. The parasites, paralyzed & depleted of energy, are expelled by peristalsis.

Dosage & Administration

Cattle/Buffalo/Horse: 10-25 g/100 kg body weight. **Sheep/Goat:** 3-5 g/10 kg body weight. **Dog/Cat:** 100-150 mg/kg body weight **Poultry:** 10 g powder should be mixed with 6-8 liter drinking water or 3-5 kg feed per 100 Chicks of 4-6 week age or 30 growing or adult birds for two days. In case of poultry, 1st deworming should be done at 4-6 weeks, 2nd deworming should be done at 8-10 weeks, then every 3 months subsequently. Poultry on heavily contaminated litter are dewormed on a regular schedule often every 30 days.

Or as directed by the registered veterinary physician.

Contraindication

Animals with a history of piperazine hypersensitivity or patients with renal failure.

Use in Pregnancy

The safety of piperazine for use during pregnancy has not been determined.

Side Effect

Nausea, vomiting, colic & diarrhoea, transient headache & dizziness, urticaria, fever and viral hepatitis like disorders.

Precaution

Food and drinking water should be stopped before 12 hours of administration of the drug.
